More applications*

SB-KAWASUMI

Najuta CMD Thoracic Stent Graft System

1. Applications

- Aortic aneurysm, Stanford type B dissection, PAU etc.
- Larger ascending aorta diameter
- Shorter neck length

Deployment images for Dissection treatment*1

Preoperative

Postoperative

Deployment images for Aneurysm treatment*2

Preoperative

Postoperative

2. Features

Custom Made Najuta offers an ideal solution for each patient

■ Fast operation procedure*3

■ Fenestration's self alignment

- Pre-oriented fenestrations inside delivery sheath. (Fig.1)
- Pre-curved delivery sheath will automatically adapt to the arch shape. (Fig.1)
- Simulation test will assure accurate orientation and vessel patency. (Fig.2)

■ Zone 0 Landing*4

- Longer proximal landing zone for device stability
- Larger proximal sealing
- Reducing debranching & avoiding chimney

Fig. 1

Fig. 2

3. Clinical Experience

Since 2013, Kawasumi Najuta thoracic stent graft system*2 was chosen at approx. 2,000 cases*5 in Japan.

Today CMD Najuta Thoracic Stent Graft System is available in European markets.

* The product customization has technical limitation and the specification is subject to be decided according to its treatment effectiveness and risk.
